Lorenzo Rossaro

Clinical/Research Interests
Lorenzo Rossaro is an internationally recognized authority on liver disease (hepatitis C, acute liver failure and cirrhosis). He received his medical training in his native Italy and the United States, where he was a Fulbright scholar. Dr. Rossaro has contributed to a management guide for fulminant hepatic failure, and his contributions to innovative treatments for hepatitis C that appeared in the New England Journal of Medicine, Gastroenterology, and Hepatology. Dr. Rossaro's research focuses on complications of liver disease. He also is studying telemedicine as a tool to close the gap of access to specialty care from rural areas.

Title
Professor, Chief of Gastroenterology and Hepatology

Specialty
Gastroenterology and Hepatology, Internal Medicine

Address
UC Davis Medical Center, 2315 Stockton Blvd. Sacramento, CA 95817

Phone
(916) 734-2737

Languages
Italian

Education
University of Padova School of Medicine, Padova, Italy, M.D., 1982

Residency
University of Padova School of Medicine, Padova, Italy, 1982-86,

Fellowships
University of Pittsburgh, Pittsburgh, Pennsylvania, 1986-88, Gastroenterology
Veterans Administration Medical Center, Brooklyn, New York, 1982, Gastroenterology

Board Certifications
American Board of Internal Medicine, 2007
American Board of Internal Medicine, Gastroenterology, 1999

Professional Memberships
American Association for the Study of Liver Diseases
American Association of Gastroenterology
American College of Gastroenterology
European Association for Gastroenterology and Endoscopy
European Society for Organ Transplantation
North Italian Transplant Program
Society of Magnetic Resonance in Medicine
The Society for Organ Sharing
The Transplantation Society
