AUTISM EARLY SIGNS IN INFANTS

1. Unusual visual fixations
   Unusually strong and persistent examination of objects

2. Abnormal repetitive behaviors
   Spending unusually long periods of time repeating an action, such as looking at their hands or rolling an object

3. Lack of age-appropriate sound development
   Delayed development of vowel sounds, such as “ma ma, da da, ta ta”

4. Delayed intentional communication
   Neutral facial tones and decreased efforts to gesture and gain parent attention

5. Decreased interest in interaction
   Greater interest in objects than people and difficult to sustain face-to-face interactions
