Postdoctoral Fellowship in Comparative Effectiveness Research

Description:

The CHPR is pleased to announce an opportunity for postdoctoral fellowship training (MD residents/fellows or PhD scholars) supported by funding from the Agency for Healthcare Quality and Research (AHRQ).

The Quality, Safety, and Comparative Effectiveness Research Training (QSCERT) T32 Program is a multidisciplinary, postdoctoral training program in quality, safety and comparative effectiveness research. T32 institutional training grants support promising researchers who have completed a doctoral-level degree but are not yet ready for faculty appointment.

Scholars will participate in a two-year training course and will be selected based on a competitive application process in which academic qualifications, career goals, and the quality of the training environment will be important consideration for funding. We are accepting applications to fill One (1) position for the current year 2014-2015 and Two (2) positions are available for 2015-2016.

In addition to the required CER core curriculum and career development components, scholars will choose one of three different training tracks. Each track is founded on the scholar’s prior experience and training (e.g., MD vs. PhD) and individual learning needs, and has its own requirements. More information on these requirements is available at http://ucdmc.ucdavis.edu/chpr/fellowship/index.html

Skills:

Eligibility Criteria:

- Strong academic credentials and good communication skills.
- Ability to commit to all requirements of the training program.
- Hold an MD, DO, or PhD in an appropriate discipline, with completion of at least one year of residency training and achievement of medial licensure (if applicable).
- Interest in developing a career in quality, safety and/or comparative effectiveness research.
- Support from a mentor in the candidate’s proposed disciplinary home (i.e., a clinical department for MD graduates, the Betty Irene Moore School of Nursing for nursing PhD graduates, and the appropriate department for other PhD graduates). Consultation is available with program leads to identify and appropriate mentor.

Notes:

APPLICATIONS DUE BY DECEMBER 1, 2014

Please see the full call at: http://ucdmc.ucdavis.edu/chpr/qscert/call.pdf

Application at: http://ucdmc.ucdavis.edu/chpr/qscert/application.doc
