RE: Letter of Certification

To Whom It May Concern:

The Electronic Medical Records in use by the University of California, Davis Health System (UCDHS) are legally binding equivalents for handwritten signatures, in accordance with 21 CFR Part 11. The technical capabilities, configuration, and processes in use at UCDHS meet the requirements. The Electronic Medical Record (EMR) is a closed system as defined by the regulations. Electronic signatures are linked to electronic records such that the electronic signatures cannot be excised, copied, or transferred in order to alter the record.

Questions regarding the submitted certification may be directed to my office at 916-734-8808.

Kind regards,

[Signature]

Teresa Porter
Chief Compliance Officer
University of California, Davis Health System
