<p>¹ Effective 1/1/06, Medicare expanded coverage to include individual MNT delivered via Telehealth Services. For Telehealth Services, use Modifier "GT": Via interactive audio & video telecommunications system or Modifier "GQ": Via asynchronous telecommunications system.</p> <p>² Renal Disease is defined as chronic renal insufficiency not requiring dialysis for transplantation or the medical condition of a patient who has been discharged from the hospital after successful renal transplant within the last 6 months. Diabetes is Diabetes Mellitus, a condition of abnormal glucose metabolism diagnosed using the following criteria: a fasting blood sugar greater than or equal to 126 mg/dL on two different occasions; a 2 hour post-glucose challenge greater than or equal to 200 mg/dL on 2 different occasions; or a random glucose test over 200 mg/dL for a person with symptoms of uncontrolled diabetes.</p>
