The UC Davis Clinical and Translational Science Center (CTSC) requests submission of proposals in response to this call for highly innovative projects to be conducted during the 2015-2016 grant year. These awards are intended to support highly innovative projects that have the potential for unusually high impact, and will provide crucial preliminary data for new extramural grant applications. The review process will emphasize creativity, innovation of the research approaches, new process-directed concepts with a clear and sustainable goal such as community-based resource development, implementation science, novel technologies, and the potential of the project, if successful, to have a significant impact on an important clinical and translational research problem throughout the translational spectrum including community-based interventions.

Funds will be available for up to $50,000 in total costs for a 12-month period beginning July 1, 2015. No carry forward of funds will be permitted. Support may be provided for supplies and other research-related expenses; funds may not be used to purchase equipment. PI (and other faculty) salary support is not permissible. The proposal must include at least one trainee at the predoctoral (undergraduate or graduate student) or postdoctoral/clinical fellow level and the role of the trainee in the PI/faculty-driven project must be very clearly defined with a mentoring plan. Criteria in the review of applications include the use of CTSC resources for the proposed project (e.g., biomedical informatics, biostatistics, community engagement, regulatory knowledge, Clinical Research Center); applicants are encouraged to contact program directors for assistance (see CTSC website; http://www.ucdmc.ucdavis.edu/ctsc/).

**Purpose:** The UC Davis CTSC provides an academic home for clinical and translational research and is focused on speeding improvements in human health by reducing barriers in health-relevant research. The goal of the CTSC Pilot Translational and Clinical Studies Program is to enhance and augment research areas crucial to translational research by providing support for novel research projects, the development of new teams and partnerships, high risk/high impact research, projects that span the translational spectrum (T1-T4), and proposals that include trainees. In addition, the Program fosters new multidisciplinary collaborations that will enhance the integration of new process-directed concepts, techniques, and technologies. For this call for applications, highly innovative approaches, methods, and techniques from multidisciplinary teams led by a PI or co-PIs that include trainees are of primary interest and that span the translational pipeline. Potential applicants are encouraged to link basic, translational, and clinical researchers, and include novel methods for community engagement. Submissions that might have commercialization potential are also encouraged. Studies focused on electronic health records will also be considered responsive to the call. Applicants can review previously funded projects online (http://www.ucdmc.ucdavis.edu/ctsc/area/pilot/fundedProjects.html).

**Eligibility:** All full-time members of the UC Davis faculty, including faculty in the adjunct or research series. Project Scientists can participate as co-investigators or trainees.
**Application Procedure:** Proposals are requested using the 5-page form that can be downloaded from the CTSC website ([http://www.ucdmc.ucdavis.edu/ctsc/area/pilot/index.html](http://www.ucdmc.ucdavis.edu/ctsc/area/pilot/index.html)). The submission *must* include an NIH biographical sketch in the new format (maximum of 5 pages using the new NIH format) for each participating investigator including predoctoral or postdoctoral (PhD or clinical fellow) trainees. Deadline date for receipt is **June 1, 2015**.

Submitted proposals must use the following format and adhere to the requirements of the application:

- Specific Aims and Hypotheses
- Background, Significance, and Innovation
- Experimental Design (*how the proposed study is highly innovative and will address an important problem in a unique way; sample selection, data collection, analysis and evaluation plan; timeline*)
- Rationale for Requested Funds and Specific Plans for Extramural Grant Submissions
- Role of Trainee(s) and PI Mentoring Plan
- If prior funding from the CTSC how this application represents a new and unique research direction

**Additional Requirements:** The names of all investigators funded through the CTSC Pilot Translational and Clinical Studies Program will be posted on the CTSC website. In addition, all investigators and their trainees must participate in the annual CTSC retreat and/or associated workshops and symposia, acknowledge the CTSC base-operating grant in any abstracts, presentations, or publications (*with a required PMCID number*) resulting from supported studies, and provide quarterly progress reports, a final report, and an annual report.

**Application receipt deadline:** June 1, 2015  
**Earliest funding date:** July 1, 2015 (projects must be completed by June 30, 2016)

**Each PI may submit one proposal only. Please email a pdf of the complete application to:** aftarantal@ucdavis.edu

**For questions, please contact:** Alice F. Tarantal, Ph.D. (aftarantal@ucdavis.edu) or Lars Berglund, M.D., Ph.D. (lberglund@ucdavis.edu)
