Our new time and attendance system – ecotime – will be deployed this March and April across UC Davis Health System. The project steering committee has approved a sequenced deployment, as outlined below:

- March 1, 2015     Monthly Exempt Employees
- March 15, 2015    Biweekly Exempt Employees
- April 12, 2015    Remaining Health System Employees

As background, Kronos, the current system used by the Health System, will be replaced by ecotime by HBS. The deployment schedule will start with exempt employees. Exempt Employees are those who, by federal law, are not eligible for overtime pay. The new system will streamline payroll processes, eliminate manual processes and provide seamless connectivity. Currently, three UC medical centers are using time and attendance systems by HBS.

Training and deployment plans will be published next month. For additional information, please visit the project website at: http://intranet.ucdmc.ucdavis.edu/finance/ecotime_by_hbs/index.shtml.
