

SUMMER INSTITUTE 2007 JOURNAL CLUB PAPERS

Anne Knowlton

August 10th - Lisa Lit and Tyler Weeks

Polony Multiplex Analysis of Gene Expression (PMAGE) in Mouse Hypertrophic Cardiomyopathy J.B.Kim et al. Science 2007;316:1481-1484.

August 17th - Arzu Ulu and Whitney Cheung

Resolvin E1 and protectin D1 activate inflammation-resolution programmes. J.M. Schwab et al. Nature 2007; 447:899-874.

August 24rd - Padmini Sirish and Mary Saunders

Systemic Administration of Micro-dystrophin Restore Cardiac Geometry and Prevents Dobutamine-induced Cardiac Pump Failure. D. Townsend et al. Molecular Therapy 2007;15:1086-1092.

August 31th - Bonus Week - Jennifer Phipps and Stephanie Pulford

Endoscopic fluorescence mapping of the left atrium: A novel experimental approach for high resolution endocardial mapping in the intact heart. J. Kalifa et al. Heart Rhythm 2007;4:916-942.

and

Alexander Davies and Jennifer Neugebauer

Protein Kinase A-dependent Translocation of HSP90 α Impairs Endothelial Nitric-oxide Synthase Activity in High Glucose and Diabetes. H. Lei et al. Journal of Biological Chemistry 2007;292:9364-9371.

September 7th - Breanna Wallace and Richard Carpenter

Transvascular delivery of small interfering RNA to the central nervous system. P. Kumar et al. Nature 2007;448:39-43.
