The Division of General Medicine in the Department of Internal Medicine and the Center for Musculoskeletal Research and Education at the University of California, Davis are recruiting an Associate/Full Professor In-Residence. Appointees to the In Residence series are required to teach, conduct independent and funded research, and participate in university and public service.

The candidate should have research interests in bone biology, regenerative medicine, and histology. A Ph.D. or M.D. with additional formal training (equivalent to a Masters degree) in cell biology of the skeleton is required. Current research support is desirable; capacity to obtain such support is required. The selected candidate will be expected to work closely with other faculty in the Musculoskeletal Center in all of the professional schools and colleges at U.C. Davis who are involved in laboratory based musculoskeletal research who are actively involved in regenerative medicine, engineering, molecular biology, and animal disease models of aging and bone disorder. Candidates must have the interest in and ability to teach medical students, residents, and fellows. Candidates must possess the ability to work cooperatively and collegially within a diverse environment.

Applicants should send a letter of interest and CV (referencing search number IN-25R-13) to Nancy E. Lane, MD, Endowed Professor, Center for Musculoskeletal Health, Suite 2400, PSSB, 4150 V Street, Sacramento, CA, 95817 c/o Keith Mauer or e-mail at keith.mauer@ucdmc.ucdavis.edu.

For full consideration, applications should be received by April 30, 2013. However, this position will be open until filled, but not later than August 31, 2013. The University of California, Davis is an affirmative action/equal opportunity employer with a strong institutional commitment to the achievement of diversity among its faculty, staff, and students.
