ASSISTANT/ASSOCIATE PROFESSOR
University of California, Davis, School of Medicine
Department of Internal Medicine
Division of Nephrology

The University of California, Davis, School of Medicine, Division of Nephrology is recruiting for a full-time position at the Assistant or Associate Professor level in the Health Sciences Clinical Professor series. This position will be split 50%/50% between general nephrology and interventional nephrology. Candidates must be qualified for both subspecialties. The final candidate will be responsible for interventional nephrology as well as care of acute and chronic renal failure. Teaching nephrology and interventional nephrology practices and procedures during patient care activities is required. Duties will include some night and weekend call and may include rounding as an attending on the nephrology consult service at the VA and/or at the UC Davis Medical Center. Appointees to the Health Sciences Clinical Professor series are required to substantially engage in patient care and teaching and participate in University service.

Candidates must be proficient in tunneled infusion and dialysis access including insertion, revision and removal. Additionally, the ability to perform these services for ports is preferred. Expertise in hemodialysis access including fistulas and grafts with skills in venography, angiography, stenting and percutaneous thrombectomy is strongly preferred. The knowledge and ability in one or all of the following is preferred: peritoneal catheter placement, revision and removal and ligation or embolization of accessory veins.

Experience or interest in teaching medical students, residents and fellows is required. Prior experience with University service and quality assurance is preferred. The candidate must have demonstrated the ability to work cooperatively and collegially within a diverse environment.

Candidates must possess a M.D. degree and be eligible for licensure in the State of California. Candidates must be eligible for licensure in State of California Fluoroscopy. Candidates must be Board Eligible or Board Certified and either ASDIN eligible or certified in the skill set described above.

The position may, at times, require the incumbent to work with or be in areas where hazardous materials and/or infectious diseases are present.

For full consideration, application materials should be received no later than November 15th, 2012. However, the position will remain open until filled through June 30, 2013.

Letters of interest, including a complete curriculum vitae and names and addresses of three references, should be sent to:
