March 4, 2016

Dear Colleague,

I hope all is well and would greatly appreciate you circulating this to any of your medical students that may have an interest in a new research opportunity.

The Department of Otolaryngology at the University of Kansas will be establishing a one-year pre or post-doctoral research position for medical students interested in Otolaryngology. While directly reporting to Dr. Alexander Chiu, the incoming Chair of the department, the research fellow will work with the faculty and residents of the department to organize, hypothesize, direct and write clinical research projects. The department has a broad clinical research portfolio that includes robust opportunities in head and neck oncology, otology, rhinology, laryngology, graduate medical education, and health care delivery innovation. The fellow will also collaborate with Dr. Chiu and the faculty to develop an Otolaryngology educational app that will hopefully become a major resource for future medical students.

Department research infrastructure includes a motivated research staff, a clinical research nurse, and a faculty member with a PhD whose focus is Health Services Research.

Interested applicants should send or email a current CV with 2 letters of reference to Samantha Hall.

Sincerely,

Alexander Chiu, MD  
Professor and Chair  
Dept. of Otolaryngology-HNS  
KU Health System

Keith Sale, MD, FAAPA  
Associate Professor  
Residency Director  
Dept. of Otolaryngology-HNS  
KU Health System

Samantha Hall  
Senior Program Coordinator  
Dept. of Otolaryngology-HNS  
KU Health System
