WHAT DO YOU SEE?

We see a way to create new blood vessels.
You see life and limb saved.

The region’s only academic health center, UC Davis is globally recognized for discovery and innovation in vascular care. Here, internationally-renowned specialists conduct research, teach, and offer breakthrough treatments not available elsewhere. One promising study is investigating the use of patients’ own stem cells to create new blood vessels in the leg—giving hope to diabetics and others who face amputation. And that’s just the beginning.
