Monthly eyewash flush – verify

1. Access unobstructed,
2. Protective eyewash covers intact, clean and positioned correctly,
3. Bowl and spouts are clean and free of trash,
4. Place a dishpan or bucket to collect the water if there is no drain pipe,
5. The flow is continuous,
6. The eyewash covers come off when activated,
7. The water flows from both eyepieces,
8. The streams of water cross,
9. The flow continues until the paddle is moved to its resting position,
10. The water drains from the bowl,
11. Flush is documented by initialing and circling the date in the above calendar.

Fire Extinguisher – Visual Inspection (Davis Campus)
