RESEARCH ASSISTANT
Needed ASAP
1 Year Internship

The UC Davis MIND Institute is a collaborative international research center committed to the awareness, understanding, prevention, care and cure of neurodevelopment disorders.

The goal of the Infant Sibling Study is to understand the very earliest manifestations of autism and ADHD in infancy, using prospective methods to track the onset of symptoms and better understand underlying mechanisms that might put infants at risk of developing autism or ADHD.

We are looking for interns who are
• detail-oriented
• motivated
• works well independently and as part of a team
• and most importantly, ready to learn!

You do not have to be a student to apply. This position is unpaid; however it comes with many intrinsic benefits. The internship is a 1 year commitment 9 hours/week.

Infant Sibling Study volunteer responsibilities include, but are not limited to the following:
• Behavioral assessment preparation and videotaping assessments of infants and school-age children
• General data entry and filing
• Behavioral Coding
• Scoring of developmental assessments

*Transcript Notation and course units for UC Davis students are available

For any questions or if you would like to apply please email Alesha Hill: ahill@ucdavis.edu
