### Specific rotation:
- Cytopathology preparation laboratory rotation (2 weeks)
- On site evaluation of deep seated lesions in radiology (1-2 m)
- Research rotation (1 m)
- Elective rotation (1m)

### Other educational activities:
Attending Conferences:
- Mandatory conference: Cytopathology conference, Grand round, Breast health clinic conferences.
- Other conferences: Tumor board and pathology Tuesday morning conference.
General Guidelines and Graduated Responsibility:

Months 1&2:
- Signout responsibilities similar to senior residents with review of daily case load and gathering of clinical information prior to faculty signout, double-scope signout with faculty for all cases.
- Rotate in cytopathology laboratory and record-keeping areas.
- Review study sets.
- Perform FNA in clinic with faculty and fellow alternating passes.
- Identify a research project.

Months 3-12: If fellow demonstrates proficiency in the first 2 months, responsibilities can be advanced as indicated below.
- Increase signout independence – double-scope review with faculty only of selected cases by resident. Other cases are turned in with resident diagnosis for faculty signout. Faculty will provide feedback and will review discrepant cases with fellow.
- 1-2 month rotation for on site evaluation of deep seated lesions in radiology. Then attend only image-guided FNAs that radiologist requests pathologist review and provide adequacy evaluation and consultation.
- Perform all FNA passes under faculty direction and supervision in clinic.
- Begin research project.
- Identify the elective rotation
- Participate in annual QA report.
- Develop teaching study sets.
