

Stephen Wedgwood, Ph.D.

Clinical Interests	Our research investigates the roles of elevated reactive oxygen species (ROS) in the development of pulmonary hypertension associated with neonatal diseases including persistent pulmonary hypertension of the newborn (PPHN) and bronchopulmonary dysplasia (BPD). By identifying the sources of ROS and the molecular signaling pathways they influence, we aim to develop better detection and treatment strategies for newborns with PPHN and BPD.
Title	Associate Researcher
Specialty	Pediatric Neonatology
Department	Pediatrics
Division	Neonatology
Education	Ph.D., University of Edinburgh, Edinburgh, UK, 1996 B.S., University of Edinburgh, Edinburgh, UK, 1991
Fellowships	Northwestern University, Evanston, IL, 2001 University of Leeds, United Kingdom, 1999
Professional Memberships	American Heart Association American Thoracic Society Society for Free Radical Biology and Medicine
Honors and Awards	Visiting Professor Nationwide Children's Hospital, Columbus, Ohio, 2008 Children's Memorial Hospital Seed Grant Award, 2003 Cancer Research Campaign (U.K.) Postdoctoral Research Fellow, 1999 BBSRC (U.K.) Postgraduate Trainee Award, 1996 British Council Exchange Scholarship, National Institute of Genetics, Japan, 1994
