

Timothy E. Albertson, M.D., M.P.H., Ph.D.

Philosophy of Care

I believe in caring for patients and their families with respect, dignity and compassion. I focus on communicating effectively with my patients, being sensitive to their overall needs and concerns as well as their immediate medical problem. I keep my patients informed, answer their questions frankly, and involve them and their families in any decision-making process.

At UC Davis, my patients can benefit from the highest level of care achievable because of our state-of-the-art resources, knowledge, skills and technology. As a long-time resident of the Sacramento area, I have established good relationships with many health-care professionals, and I enjoy working with our community physicians and other hospitals, sharing knowledge and expertise to provide quality patient care.

Clinical Interests

Dr. Albertson is a leading expert in clinical pharmacology and toxicology, aeromedicine, and septic and adult respiratory distress syndrome. In addition to his role at UC Davis, he is a flight surgeon and chief of pulmonary and critical care medicine for the Veteran's Administration Northern California Health Care System.

Research/Academic Interests

Dr. Albertson has explored pulmonary complications of drug use. He also has analyzed cyclosporine-associated TTP in s/p lung transplantation, the biochemical effects of specific antimicrobial therapies, and cellular drug interaction in the fight against multidrug-resistant cancer.
