

Gary Wayne Raff

Clinical/Research Interests	Gary Raff is a pediatric cardiothoracic surgeon who specializes in the treatment of complex congenital heart disease and chest-wall anomalies. He treats patients of all ages, newborns to adults and has a particular interest in minimally invasive approaches for treating neurologic-related heart and chest disorders. He also is interested in international medicine and participates in Heart to Heart International Children's Medical Alliance. The Alliance is a non-profit group that provides care and training to sponsored hospitals in Russia.
