

Dominik R. Haudenschild, Ph.D.

Clinical Interests

Dr. Haudenschild's research focus is in the interactions between the chondrocyte cytoskeleton and signal transduction events which lead to the regulation of gene expression and extracellular matrix synthesis required for the maintenance of health cartilage and the interactions between COMP and ADAMTS enzymes that create osteoarthritis biomarkers.

Research/Academic Interests

We study early responses to joint injury to learn about the pathogenesis of osteoarthritis and to identify intervention strategies. We study chondrocyte mechanobiology to understand how mechanical forces are translated into biochemical responses. We study cartilage matricellular proteins to gain insight into how cells interact with growth factors and the extracellular matrix. We use animal models of joint injury and bone formation, explant models of osteochondral injuries, stem-cell based tissue engineering, and 3-axis bioreactors to mechanically stimulate hydrogel-embedded chondrocytes and stem cells.

We apply the knowledge to translational studies. Example: Intervene with inflammatory gene expression upon joint injury to prevent or delay OA. Example: Enhance BMP-mediated bone regeneration by presenting the growth factor in a biologically relevant context on matricellular proteins.

Title Associate Professor

Specialty Orthopaedic Research

Department [Orthopaedic Surgery](#)

Division Orthopaedic Research

Address/Phone Research I , 4635 2nd Ave. Suite 3004 Sacramento, CA 95817

Languages German

Education Ph.D., UC Davis, Davis, California, 2003
B.A., Boston University, Boston, Massachusetts, 1989

Professional Memberships

American Society for Bone and Mineral Research
Editorial Review Board - Journal of Orthopaedic Research, Cartilage
Faculty of 1000 Prime (F1000)
International Cartilage Repair Society

Dominik R. Haudenschild, Ph.D.

Honors and Awards

Orthopaedic Research Society, Active Member
OsteoArthritis Research Society International, Active Member

Orthopaedic Research Society Exchange Grant, 2015
Arthritis Foundation Innovative Research Grant, 2011
Earle C. Anthony Scholarship Award, 1998
