

Khyati Brahmhatt, M.D.

Philosophy of Care	True well-being requires an understanding of the interconnectedness of systems ranging from the individual to the institutional and meaningful healing requires a holistic approach.
Clinical Interests	My main area of interests are pediatric psychosomatic medicine, neurodevelopmental disorders such as ADHD and 22q11.2 deletion syndrome, and medical student and resident education. I am working with a multi-disciplinary team on kids with 22q11.2 deletion syndrome.
Research/Academic Interests	Dr. Brahmhatt's research interests includes working on improving understanding of the impact of medical illness on mental health and vice versa especially pertaining to children.
