

Granger B. Wong, D.M.D., M.D.

Clinical Interests	Dr. Wong's distinct perspective on managing congenital anomalies has allowed development of crossover techniques in aesthetic surgery. He applies virtual-reality computer software, endoscopic (minimally invasive) surgery, ultrasound and lasers to aesthetic body contouring and facial rejuvenation. His clinical practice includes aesthetic surgery, congenital craniofacial anomalies (including cleft lip and palate), pediatric plastic surgery, maxillofacial surgery and vascular anomalies. Dr. Wong's research interests are in distraction osteogenesis, resolvable biomaterials and minimally invasive surgical techniques.
