

Andrew K. Oh, M.D.

Philosophy of Care

Neurological disease affects a person in a way that no other disease can. Your brain is responsible for every thought you have, every emotion you feel, and every movement you make. Your brain is the essence of what makes you human. Understanding neurological symptoms can be a daunting task, in part because the human nervous system is so complex. As your neurologist, I will be your guide through the maze of available tests and treatments for your neurological condition. I will help you understand what your condition is, what it means for you, and what you and I can do to minimize its effects on your daily life. I firmly believe that an informed patient is a happier and healthier patient.

Not all symptoms can be easily explained. Not all conditions can be cured. Neurology, and the practice of medicine in general, is more often about caring than curing. I will always strive to find the answers to the problems which bother you, with particular emphasis on uncovering conditions which are treatable. I will also focus on making sure you understand your condition because knowing what you are up against is half the battle. I know that even though a physician may not be able to cure your disease, having a physician who cares can make a world of difference. I have found this to be true when I have been a patient.

Title	Associate Clinical Professor, Health Sciences
Specialty	Neurology
Department	UC Davis Medical Group
Division	UC Davis Medical Group, Carmichael/Citrus Heights
Clinic	UC Davis Medical Group, Carmichael
Center/Program Affiliation	UC Davis Medical Group
Address/Phone	UC Davis Medical Group - Carmichael, 7551 Madison Ave. Citrus Heights, CA 95610 Phone: 916-904-3000
	Glassrock Building, 2521 Stockton Blvd. Suite 5200 Sacramento, CA 95817 Phone: 916-734-5400
Additional Phone	Physician Referrals: 800-4-UCDAVIS (800-482-3284)

Andrew K. Oh, M.D.
