

Deborah Hall Bennett, M.S., Ph.D.

Clinical Interests	<p>Dr. Bennett's research focuses on the measurement and modeling of organic compounds in the indoor environment, an area of great importance from a health perspective. Compounds of interest include particulate matter, volatile and semi-volatile organic compounds. Ultimately, the goal of her work is to develop tools to help policy makers reduce our exposure, and subsequent health effects, to pollutants in the environment.</p> <p>She accomplishes her work through two primary means, by advancing exposure science through her own projects, as well as by working to support environmental epidemiology projects conducted by others. Her current work focuses on childhood asthma, autism, and rapid evaluation of exposure in indoor environment.</p>
Title	Associate Professor
Specialty	Environmental Health, Public Health Sciences-Division of Epidemiology
Department	Public Health Sciences
Division	Epidemiology
Address/Phone	UC Davis School of Medicine, UC Davis School of Medicine - Medical Sciences 1C, Suite 118 Davis, CA 95616
Education	M.S., UC Berkeley, Berkeley, California, 1996 Ph.D., UC Berkeley, Berkeley, California, 1999 B.S., UCLA, Los Angeles, California, 1993
Professional Memberships	American Chemical Society International Society of Exposure Science
Honors and Awards	Student Presentation Award, Society for Risk Assessment, 1998
