

Iannis E. Adamopoulos, B.Sc.(Hons), M.Phil., D.Phil.

Research/Academic Interests	Our laboratory studies the interface between the skeletal and immune systems, a newly emerging area of research called “osteimmunology”. Haematopoietic stem cells in the bone marrow give rise to both T cells which are important in inflammation and osteoclasts that regulate bone resorption. Differentiation and activation of osteoclasts from their precursors is tightly regulated by cytokines and growth factors such as receptor activator of nuclear factor kappa beta (RANKL), tumor necrosis factor (TNF) and various interleukins. Receptor engagement of these molecules results in signaling cascades and transcriptional changes that give rise to medical conditions such as rheumatoid arthritis, osteoporosis and osteopetrosis. Using in vivo gene transfer of immune cytokines IL-23 and IL-17, we have established new arthritis animal models that highlight the importance of these immune cytokines in arthritis initiation and bone homeostasis. Using in vitro assays, we continue our attempts to define the cellular and molecular mechanisms that take place in this fascinating interplay of the immune and skeletal systems.
Title	Associate Professor, Department of Internal Medicine, Division of Rheumatology, Allergy and Clinical Immunology
Specialty	Internal Medicine, Rheumatology, Allergy and Clinical Immunology, Osteoimmunology, Arthritis
Department	Internal Medicine
Division	Rheumatology, Allergy and Clinical Immunology
Languages	Greek
Education	M.Phil, University of London, London, UK, 2003 D.Phil., University of Oxford, Oxford, UK, 2006 B.Sc. (Hons), University of Surrey, Guildford, Surrey, UK, 1997
Fellowships	Wolfson College, Oxford, UK, 2006
Professional Memberships	American Association of Immunologists American Society of Bone and Mineral Research British Biochemical Society British Society for Research Into Aging International Cytokine Society (ICS)
Honors and Awards	Arthritis National Research Foundation Fellow, 2011 Sontag Fellow, 2011 Wolfson College, Oxford D. Phil Scholarship, 2003
