

E. Bradley Strong, M.D.

Clinical Interests Dr. Strong's clinical interest lies in reconstructive facial plastic surgery as well as sinusitis and endoscopic sinus surgery. Dr. Strong is internationally recognized for his expertise in the treatment of facial trauma and post traumatic facial deformities. He has pioneered minimally invasive, endoscopic approaches for the treatment of orbital blow out and frontal sinus fractures, as well as computer assisted techniques for facial reconstruction. Dr. Strong also has extensive experience in the use of endoscopy and computer aided surgery for the treatment of chronic sinusitis and benign skull base tumors.

Research Focus

Reconstructive Facial Plastic Surgery- Minimally invasive, endoscopic treatment of facial fractures, Orbital blow out fractures, Frontal sinus fractures, Zygomaticomaxillary complex fractures, Computer assisted maxillofacial surgery, Reconstruction of the orbit and bony skeleton with, bioabsorbable implants, Image guided surgery in facial trauma.

Sinusitis/Endoscopic Surgery-Computer aided applications for the treatment of chronic sinus disease
