

John Luke, M.D.

Philosophy of Care

I believe much of my role is education, and preventative care which is best achieved through open communication. I attempt to inform patients on how to avoid illness and to treat chronic diseases efficiently. I am interested in the entire spectrum of family care, from newborn to end of life care. I believe that engaging the whole family can give more understanding of individual health as many factors are involved. I have a Masters in Hyperbaric Medicine, and enjoy sports medicine issues. I also enjoyed practicing family obstetrics and liked supporting that exciting time in a family's life. I bring the experience of obstetrics to the womens health and pediatric facets of my practice.

Specialty Family and Community Medicine
