

## Amr Badawi, M.D.

<b>Philosophy of Care</b>	Patients are treated as family members. Patients must be thoroughly educated about their health and any investigations and treatments that are ordered for them.
<b>Clinical Interests</b>	I am a passionate believer in the saying that “Prevention is better than cure,” and that if a treatment or cure is needed, then the more natural it is, the better. And hence the emphasis on what I call the three pillars of good health: Good exercise, Good nutrition and good sleep.
