

Tyron Arnott, M.D.

Philosophy of Care	I went into internal medicine to be able to diagnose and treat most diseases on both an inpatient and outpatient basis. My practice is distinguished by my approach. I try to give patients information on all the options concerning their specific illness, and together, we proceed with the best treatment. My goal is to provide complete, professional care to my patients, along with the dignity and honesty they deserve. Good health depends on many factors, including early screenings, close follow-up and good communication between doctor and patient. Working at UC Davis, I have the opportunity to provide my patients with another important element — access to highly trained specialists and inpatient care found only in university settings.
Clinical Interests	Tyron Arnott diagnoses and treats most general health problems. He first provides patients with information on all the options concerning their specific illness. Then he proceeds with the treatment plan in partnership with his patients. Arnott believes that good health depends on many factors, including early screenings, close follow-up and good doctor-patient communication.
