

Kit S. Lam, M.D., Ph.D.

Research/Academic Interests

Dr. Lam is an expert in combinatorial chemistry, chemical biology, drug development, molecular imaging, nanotherapeutics and medical oncology. His laboratory is engaged in the development and application of combinatorial library methods for basic research and drug discovery. In addition to cancer drug development, he is also interested in signal transduction, antibiotics development, molecular immunology, chemical microarray, and proteomics.

Dr. Lam is both a practicing medical oncologist and a laboratory investigator. He is acclaimed for his pioneering role in the field of combinatorial chemistry and developing the novel one-bead-one-compound technology, which rapidly screens millions of chemicals at one time to identify those that bind to diseased cells. The tool is advancing the early detection and precise delivery of treatments for brain, breast, prostate, pancreatic, lymphoma and other cancers. In addition, it is advancing the discovery of imaging agents that produce highly detailed molecular profiles of diseases for improved diagnosis and tracking medication effectiveness.

His development and applications of combinatorial chemistry and other chemical methods look to solve many biomedical problems. Dr. Lam invented the "one-bead-one-compound" (OBOC) combinatorial library method, filed the patents and published the technique in Nature in 1991. This represents one of the first few reports in the new field of combinatorial chemistry at the time. Since then, the field of combinatorial chemistry has rapidly evolved into a new chemistry discipline, and has become an indispensable tool in drug development and chemical research. The OBOC combinatorial library approach is unique and truly an ultra-high throughput method, as thousands to millions of chemical compounds (peptides, peptidomimetics, small molecules, and macrocyclic natural product like molecules) can be efficiently synthesized and screened in parallel in a relatively short time.

In addition to expanding the use of one-bead-one-compound technology, Dr. Lam's research also includes developing a blood test for ovarian-cancer detection, utilizing nanoparticle carriers for drug delivery and synthesizing cancer-fighting molecules with less-toxic side effects. He is currently collaborating on projects to identify the molecular pathogenesis of and treatments for primary biliary cirrhosis, osteoporosis and Alzheimer's disease.

Title Professor and Chair, Department of Biochemistry and Molecular Medicine
Professor, Hematology and Oncology

Specialty Biological Chemistry, [Cancer](#), Hematology Oncology, Internal Medicine, Molecular Biology/Medicine

Department [Biological Chemistry and Molecular Medicine](#)
[Internal Medicine](#)

Kit S. Lam, M.D., Ph.D.

Division	Biological Chemistry Hematology and Oncology
Center/Program Affiliation	UC Davis Comprehensive Cancer Center
Address/Phone	Oak Park Research Center Building, Department of Biochemistry and Molecular Medicine, 2700 Stockton Blvd. Suite 2102 Sacramento, CA 95817 Phone: 916-734-4417
Additional Phone	Phone: 916-734-0910 Physician Referrals: 800-4-UCDAVIS (800-482-3284)
Languages	Cantonese, Mandarin
Education	M.D., Stanford University School of Medicine, Palo Alto, California, 1984 Ph.D., University of Wisconsin, Madison, Wisconsin, 1980 B.A., University of Texas, Austin, Texas, 1975
Residency	University of Arizona, Tucson, Arizona, 1984-87
Fellowships	University of Arizona, Tucson, Arizona, 1987-89
Board Certifications	American Board of Internal Medicine, 1987 American Board of Internal Medicine, Medical Oncology, 1989
Professional Memberships	American Association for Cancer Research American Chemical Society American College of Physicians American Peptide Society Society of Chinese Bioscientists in America
Honors and Awards	Fellow of American College of Physicians, 2008 Award of the Society of Combinatorial Sciences for pioneering contribution to and remarkable scientific accomplishments in combinatorial sciences throughout my career (First International Symposium on Combinatorial Sciences held in Florence, Italy, 2007), 2007 Cathay Award (Chinese Peptide Symposium 1998), 1998 Stohlman Scholar (Leukemia Society of America), 1997 Upjohn Research Award for Outstanding Achievement in Cancer Research, 1989 Research Honors Award at Stanford University School of Medicine, 1984 Chinese American Physicians Society Scholarship, 1980

Kit S. Lam, M.D., Ph.D.

Graduated with highest honors and special honors in microbiology, 1975

Phi Kappa Phi, 1975

Phi Beta Kappa, 1975
