

Jeffrey J. Caspar, M.D.

Clinical Interests	Dr. Caspar treats a wide variety of ophthalmic disorders. He specializes in small-incision cataract surgery using the latest technologies, including multifocal and astigmatism-correcting lens implants. He also specializes in laser vision correction, including custom and conventional LASIK, PRK, LASEK and clear-lens extraction. He is involved in research on cataract surgery after refractive surgery and new techniques for cataract extraction. He is board certified by the American Board of Ophthalmology and helps train other ophthalmologists in advanced cataract surgery techniques and refractive surgery.
