

Enkhmaa Byambaa, M.A.S., M.D., Ph.D.

Clinical Interests	<p>Dr. Byambaa's research interest is focused on risk factors for cardiovascular diseases (CVD), including metabolic syndrome, genetics and lipid and lipoprotein metabolism in various ethnic/racial groups. A major interest has been to identify factors that impact on Lipoprotein(a), Lp(a), a genetically regulated cardiovascular risk factor.</p> <p>Her current research projects: to test the suitability of rhesus monkey as a model system for studies on Lp(a), to assess the roles of inflammation, endocrine dysregulation, HIV disease activity and antiretroviral therapy in modulating Lp(a) levels and associated atherogenic properties, and to identify genetic determinants of Lp(a) levels in humans.</p>
Title	Assistant Adjunct Professor
Specialty	Cardiovascular Research, Lipid and Lipoprotein Metabolism
Department	Internal Medicine
Division	Endocrinology, Diabetes, and Metabolism
Center/Program Affiliation	Clinical and Translational Science Center
Languages	Japanese, Mongolian, Russian
Education	M.D., Mongolian National Medical University, Ulaanbaatar, 1998 Ph.D., Shimane University School of Medicine, Izumo/Shimane Prefecture, 2005 M.A.S., UC Davis School of Medicine, Sacramento, California, 2013
Internships	University Hospital, Ulaanbaatar, 1999
Professional Memberships	American Association for the Advancement of Science American Heart Association
Honors and Awards	UCD Excellence in Postdoctoral Research Award, nominee, 2010
