

Stanley M. Naguwa, M.D.

Philosophy of Care	Understanding of the immunological cause of diseases was just beginning when I was in residency. The specialty intrigued and challenged me, both then and now. Education is the most important service that I deliver. Patients need knowledge to make the best decisions. I enjoy teaching patients, nurses, students—everyone. I believe in a team approach to medical care and that the patient is a full partner in health-care delivery. UC Davis has a special commitment to teaching and a wealth of resources, including professional and technical expertise, equipment and dedication to excellence.
Clinical Interests	In addition to his expertise in the full spectrum of allergic and rheumatologic diseases, Stanley M. Naguwa has a special clinical interest in Sjögren's syndrome, rheumatoid arthritis, and complex allergic diseases. Prevention, patient education and public awareness are important focuses of his work. His research focuses on biologic markers for SLE.
