

# Michael S. Wilkes, M.D., M.P.H., Ph.D.

**Clinical Interests** Michael Wilkes is widely known for his efforts to introduce medical students to the humanistic side of being a physician, and for working tirelessly to include the public health and social sciences as part of training physicians. During his tenure as Vice Dean of the Medical School he led the way toward enormous changes in medical education at UC Davis including the rural prime program, the college system of mentoring, a new education building, and a dramatic shift away from lectures toward small group and interactive learning. Wilkes introduced UC Davis' "Doctoring" curriculum, a series of classes and seminars for all four years of medical school. Topics within the curriculum include doctor- patient communication, clinical reasoning and end-of-life care, to name but a few. Dr. Wilkes has extensive experience in the development, management, and evaluation of eLearning technologies. In his current capacity as Director of Global Health he works locally with the UC Davis Vet and Nursing faculty and with medical and health sciences schools around the world as they seek to train the most capable health providers to address local health needs. He serves as a reviewer for many medical publications. He is the Director of the UC Davis Adolescent Clinic.
