

Arthur Swislocki, M.D.

Philosophy of Care	Dr. Swislocki tries to involve the patient as a team member since the conditions we are treating are lifelong and require the patient's active involvement to the best of their ability. His role is to educate and encourage them, and to provide them the resources they need to be successful.
Clinical Interests	<p>Dr. Swislocki is board-certified in Internal Medicine and Endocrinology and Metabolism. His practice is almost entirely by referral and clinic-based. His primary interest is in disorders of insulin resistance, such as hypertension, diabetes, and diabetes complications, but he is also interested in caring for patients with chronic metabolic diseases such as obesity and osteoporosis. He enjoys caring for patients with other endocrine diseases as well.</p> <p>Disorders of insulin resistance, specifically: Hypertension, diabetes mellitus, complications of diabetes mellitus, and pathophysiology of insulin resistance. He is also interested in delivery of health care to people with chronic metabolic diseases, including diabetes, hypertension, and osteoporosis.</p>
