

James E. Boggan, M.D.

Clinical Interests	Dr. Boggan heads a specialty team that treats difficult-to-resect tumors of the head, neck and surrounding structures. He also is an expert in pediatric neurosurgery.
Research/Academic Interests	Dr. Boggan is interested in the innovative use of lasers and other energy sources for treating brain cancers, including photodynamic therapy and neutron-capture therapy for treatment of glioblastomas. His research investigations include retinoic acid receptor expression in primary and metastatic brain tumors, and whether gadolinium texaphyrins (contrast MRI agents) can make high-grade gliomas and glioblastomas more radiosensitive.
