UCDAVIS
MEDICAL GROUP

medicalgroup.ucdavis.edu

UC Davis Medical Group offers nationally renowned primary care and specialty expertise based at UC Davis Medical Center and multiple medical offices across the greater Sacramento region. Medical group physicians, nurse practitioners and clinical nurse specialists emphasize wellness and prevention, apply the latest knowledge to solve health problems and offer access to promising clinical trials, newly proven therapies and advanced technologies when needed.

FOR PATIENTS

Find a UC Davis physician, nurse practitioner or clinical nurse specialist

Consumer Resource Center: **800-2-UCDAVIS (800-282-3284)**

- General information about available providers and services
- Assistance with appointments and referrals
- Information about accepted insurance plans

Established UC Davis patients can also use the MyChart web-based portal to communicate with their care teams, request certain appointments and refills, access medical records and more.

FOR HEALTH PROFESSIONALS

Outpatient referrals and provider phone consultations

UC Davis Physician Referral Center: **800-4-UCDAVIS (800-482-3284) Option #2** Monday | Friday, 8 a.m. to 5 p.m. Or online (non-urgent) requests via referrals.ucdavis.edu

- Information about availability of specialty services
- Coordination and status of referrals to specialty services
- Assistance for provider-to-provider phone consultations with specialists

Acute interfacility transfers and after-hours consultations

24/7 Transfer Center: **800-4-UCDAVIS (800-482-3284)**

- Round-the-clock, R.N.-led coordination of acute interfacility transfers
- After-hours coordination of emergent provider-to-provider telephone consultations for complex or unusual cases
- transfer requests evaluated based upon clinical urgency, availability of resources and other factors

Referring physicians can receive real-time access to test results and clinical information for their patients at UC Davis through the PhysicianConnect online electronic medical record.

Brian A. Davis, M.D., F.A.B.P.M.R., F.A.C.S.M., F.A.B.N.E.M., F.A.B.R.M

Brian A. Davis welcomes LGBT patients.

Clinical Interests

Dr. Davis specializes in the nonsurgical treatment of sports and musculoskeletal disorders. He has published and lectured extensively on sports medicine topics and has provided medical care to all levels of athletes. He served as the U.S. Team Physician for the 2004 Paralympic Team in Athens, Greece. He has also served as the Team Physician for USA Swimming, USA Track and Field, and the Sacramento River Cats Baseball Team (Triple A). He is currently the Co-Head Team Physician for the Sacramento Republic FC Soccer Team (MLS Div III) and Team Physician for the California State University, Sacramento (Sac State) athletic programs. Dr. Davis also has provided medical sporting event coverage at the 2012 Olympics, 2010 Paralympics, the 2002 Olympic and Paralympic Games, the USA Track and Field Olympic Trials and National Championships, and the USA Boxing National Championships.

Dr. Davis employs the philosophy that exercise truly is medicine. He is a strong advocate for the use of exercise as a healing tool and to re-train athletes to return to their sport of enjoyment, whether it is at the professional or recreational level. He recommends Yoga, Pilates, Cross-Fit, physical therapy and many other training modalities to assist with athlete recovery. He may recommend injections for improved health and is a leader in the area of the use of ultrasound for the evaluation of injuries and the guidance of injections where needed. He is one of several UC Davis Sports Medicine physicians that are using one's own blood via injection to attempt to stimulate healing without surgery.

Dr. Davis currently serves as an official team physician for the Sacramento Republic FC professional men's soccer team.

Research/Academic Interests

Dr. Davis' research interests include:

1. The Hormonal and Mechanical Factors of Knee Osteoarthritis Progression for Women.
2. Effect of Prolain on Exercise Performance, Metabolism and Post-Exercise Recovery in Healthy Subjects.
3. Effect of elevATP on Energy Levels, Metabolism and Exercise Performance in Healthy Athletes.
4. Effect of Sustained and Continuous Cooling on Physiology, Perceived Effort and Performance, While Riding in Hot Conditions.

Erik K. Henricson, Ph.D., M.P.H.

Erik K. Henricson welcomes LGBT patients.

Research/Academic Interests

In the past two decades we have experienced rapid evolution in our understanding of the molecular and biological basis of many pediatric neuromuscular diseases. As a result, there has been an increased need to understand disease natural history and to develop assessment methodology to support design of intervention-focused clinical trials.

Over the past 17 years Dr. Henricson served first as co-director of the 25-site Cooperative International Neuromuscular Research Group (CINRG) (www.cinrgresearch.org) and then as a co-founder of the Neuromuscular Research Center in the UC Davis Department of Physical Medicine and Rehabilitation.

He has been a leader in the development of neuromuscular disease-directed clinical trials, clinical and patient-reported outcome measures for use in clinical trials, and establishment of an international infrastructure in which to conduct those trials.

His work has focused in four main areas, including development of assessments for clinical trials, conduct of “bench-to-bedside” translational research, epidemiologic “natural history” studies of neuromuscular disease, and assessment of community mobility.

Since 2005, Dr. Henricson has been co-chair of the UC Davis / CINRG Duchenne Natural History Study, integrating clinical, person-reported, genetic and biomarker data from boys and young men with Duchenne muscular dystrophy (DMD) at 20 collaborating medical centers worldwide.

The study updates our understanding of the natural history of DMD and is among the first of its kind to examine the link between genetic characteristics, treatment response, strength and function and community mobility to explain variations in disease progression.

Dr. Henricson is currently working to develop new tools to measure functional health and mobility in the lab and in the community using technology-enabled measurement tools and patient-reported questionnaires, and to examine neurocognitive aspects of neuromuscular diseases including DMD.

Julie Lynn Ingwerson, M.D.

Julie Lynn Ingwerson welcomes LGBT patients.

Philosophy of Care

Dr. Ingwerson joined UC Davis and Shriners Hospitals for Children to be a part of the stellar multi-disciplinary, integrated treatment team for athletes of all ages and abilities. She has always had a passion for exercise and sport as an athlete herself as well as with her professional pursuits.

Dr. Ingwerson obtained her B.S. in Exercise Science prior to medical school and then completed her residency training in Physical Medicine & Rehabilitation - a field in which physicians focus on getting patients of all abilities back to their desired level of function. She then completed a Sport Medicine fellowship to focus purely on her passion for treating athletes. Dr. Ingwerson's background has ranged from caring for athletes in elementary to high school and college ages in addition to athletes at ski resort clinics and professional athletes as well as multi-day endurance athletes in South America.

Dr. Ingwerson enjoys seeing athletes of all ages, abilities and sport disciplines at UC Davis and Shriners Hospitals for Children. She has additional focus on the areas of ultrasound and injection procedures.

Every athlete is welcome at UC Davis Sports Medicine. We look forward to helping you get back in the game!

Nanette C. Joyce, D.O., M.A.S.

Philosophy of Care Dr. Joyce believes in multidisciplinary patient centered care for treatment and education of rare neuromuscular disorders.

Clinical Interests Dr. Joyce specializes in Physical Medicine and Rehabilitation with a subspecialty in Neuromuscular Medicine. Her clinical interests focus on the diagnosis and treatment of motor neuron diseases, muscular dystrophies and myopathies. Dr. Joyce also specializes in electrodiagnostic medicine. Additionally, she is uniquely trained in the use of ultrasound to diagnose diaphragm dysfunction in patients with diaphragm paralysis due to motor neuron loss or phrenic nerve abnormalities.

Research/Academic Interests Dr. Joyce completed a clinical research fellowship sponsored by the California Institute of Regenerative Medicine working to develop a stem cell therapy for patients diagnosed with ALS. She continues to be part of a translational stem cell team, at the Institute for Regenerative Cures, that is dedicated to bringing stem cell therapies to clinic for patients with neuromuscular disorders. In addition, her clinical research interest focuses on developing better diagnostic strategies and treatments for patients with ALS and other neuromuscular diseases.

Craig M. McDonald, M.D.

Clinical Interests	Craig McDonald, M.D. is an internationally recognized expert in the clinical management and rehabilitation of neuromuscular diseases including muscular dystrophies and the development of novel outcome measures for clinical trials. He also is widely known for his expertise in the management of children and young adults with spinal cord injury and spina bifida.
Research/Academic Interests	<p>McDonald directs the NIDRR-funded Rehabilitation Research and Training Center in Neuromuscular Diseases and serves as principal investigator of the UC Davis NINDS-funded site in the NeuroNEXT Neurosciences Clinical Trials National Consortium. He is recipient of over \$16 million in federal grant support over the past 12 years.</p> <p>McDonald has been involved in a multitude of NIH, MDA, CDC and Shriners hospitals national committees and serves as a consultant to the pharmaceutical industry regarding clinical trials in Duchenne muscular dystrophy and other muscular dystrophies. He has served on many NIH study sections reviewing research proposals relating to neuromuscular diseases and rehabilitation sciences.</p> <p>His research has focused on novel clinical endpoint development in neuromuscular diseases, clinical trials and natural history studies in muscular dystrophies, metabolic syndrome, and energy expenditure in childhood disabilities.</p>

Cassie Justine Spalding-Dias, M.D.

Cassie Justine Spalding-Dias welcomes LGBT patients.

Philosophy of Care

Dr. Spalding believes the role of inpatient rehabilitation is to maximize her patients' functioning to return them home safely, as independently as possible, and to support each patient and family as they face a new disabling condition. She feels inpatient rehabilitation is a team effort, with the patient and family serving as the leader of that team.

Clinical Interests

Dr. Spalding provides inpatient rehabilitation for patients with brain injuries, spinal cord injuries, strokes and other neurologic disorders, as well as orthopedic surgeries or traumas, burns, and other medical conditions.

She has a special interest in severe traumatic brain injury and works closely with the Neurosurgery and Trauma departments in early care of the brain injured patient.

Research/Academic Interests

Outside referrals are for inpatient care only and inpatient consultations can be provided by telemedicine through our tele-health dept.

Carol Vandenakker-Albanese, M.D.

Clinical Interests Dr. Vandenakker Albanese has clinical interests in diagnosis and non-operative care of spine conditions and problems related to sequelae of polio. She speaks locally, nationally and internationally on topics related to spine care and the management of polio-related conditions. Dr. Vandenakker-Albanese is well-known for her expertise in post-polio syndrome and established the UC Davis Post-Polio Clinic in 2001. She serves on the Board of Directors and the medical advisory board for Post-Polio Health International as well as several local post-polio support groups.

Dr. Vandenakker-Albanese reviews manuscripts for multiple medical journals and has authored several book chapters and peer-reviewed journal publications on topics relating to aging with disability, and rehabilitation of spine and post-polio conditions.

As the department's Mentoring Director, Residency Program Director and as a Faculty Mentor for the medical school, she promotes quality medical education and fosters professional development.

Brandee L. Waite, M.D.

Clinical Interests

Dr. Waite's clinical focus is sports medicine and physical rehabilitation medicine, where she has served and treated wide range of elite athletes participating in professional leagues, national teams and extreme-endurance competitions. She also cares for "weekend warrior" level athletes and non-athletes with joint, muscle and nerve issues that prevent them from reaching daily activity goals. Dr. Waite has served as a team physician for the U.S. national track and field program, for Sacramento's professional men's and women's basketball teams, and also for the Sacramento Ballet. She currently serves as an official team physician for the Sacramento Republic FC professional men's soccer team and for UC Davis, American River College and Sacramento City collegiate sports teams. She has directed multiple marathons and ultra-marathons including the California International Marathon and Racing The Planet, an organization that sponsors adventure races in Antarctica, the Sahara desert, the Himalayas and other extreme-weather locations worldwide.

Research/Academic Interests

Dr. Waite's research focuses on musculoskeletal medicine and on physiologic changes, injuries and injury prevention in extreme-endurance athletes, especially ultramarathoners. Specific topic areas include knee osteoarthritis, anti-inflammatory treatments and prophylaxis, electrolyte levels and body composition changes. She has published book chapters and journal articles on a wide range of topics and presented for organizations such as the American College of Sports Medicine and the American Medical Society for Sports Medicine. Dr. Waite co-directs the sports medicine fellowship program in UC Davis Health System's Department of Physical Medicine and Rehabilitation.
