UCDAVIS
MEDICAL GROUP

medicalgroup.ucdavis.edu

UC Davis Medical Group offers nationally renowned primary care and specialty expertise based at UC Davis Medical Center and multiple medical offices across the greater Sacramento region. Medical group physicians, nurse practitioners and clinical nurse specialists emphasize wellness and prevention, apply the latest knowledge to solve health problems and offer access to promising clinical trials, newly proven therapies and advanced technologies when needed.

FOR PATIENTS

Find a UC Davis physician, nurse practitioner or clinical nurse specialist

Consumer Resource Center: **800-2-UCDAVIS (800-282-3284)**

- General information about available providers and services
- Assistance with appointments and referrals
- Information about accepted insurance plans

Established UC Davis patients can also use the MyChart web-based portal to communicate with their care teams, request certain appointments and refills, access medical records and more.

FOR HEALTH PROFESSIONALS

Outpatient referrals and provider phone consultations

UC Davis Physician Referral Center: **800-4-UCDAVIS (800-482-3284) Option #2** Monday | Friday, 8 a.m. to 5 p.m. Or online (non-urgent) requests via referrals.ucdavis.edu

- Information about availability of specialty services
- Coordination and status of referrals to specialty services
- Assistance for provider-to-provider phone consultations with specialists

Acute interfacility transfers and after-hours consultations

24/7 Transfer Center: **800-4-UCDAVIS (800-482-3284)**

- Round-the-clock, R.N.-led coordination of acute interfacility transfers
- After-hours coordination of emergent provider-to-provider telephone consultations for complex or unusual cases
- transfer requests evaluated based upon clinical urgency, availability of resources and other factors

Referring physicians can receive real-time access to test results and clinical information for their patients at UC Davis through the PhysicianConnect online electronic medical record.

Loren Thomas Davidson, M.D.

Brian A. Davis, M.D., F.A.B.P.M.R., F.A.C.S.M., F.A.B.N.E.M., F.A.B.R.M

Clinical Interests

Dr. Davis specializes in the nonsurgical treatment of sports and musculoskeletal disorders. He has published and lectured extensively on sports medicine topics and has provided medical care to all levels of athletes. He served as the U.S. Team Physician for the 2004 Paralympic Team in Athens, Greece. He has also served as the Team Physician for USA Swimming, USA Track and Field, and the Sacramento River Cats Baseball Team (Triple A). He is currently the Co-Head Team Physician for the Sacramento Republic FC Soccer Team (MLS Div III) and Team Physician for the California State University, Sacramento (Sac State) athletic programs. Dr. Davis also has provided medical sporting event coverage at the 2012 Olympics, 2010 Paralympics, the 2002 Olympic and Paralympic Games, the USA Track and Field Olympic Trials and National Championships, and the USA Boxing National Championships.

Dr. Davis employs the philosophy that exercise truly is medicine. He is a strong advocate for the use of exercise as a healing tool and to re-train athletes to return to their sport of enjoyment, whether it is at the professional or recreational level. He recommends Yoga, Pilates, Cross-Fit, physical therapy and many other training modalities to assist with athlete recovery. He may recommend injections for improved health and is a leader in the area of the use of ultrasound for the evaluation of injuries and the guidance of injections where needed. He is one of several UC Davis Sports Medicine physicians that are using one's own blood via injection to attempt to stimulate healing without surgery.

Dr. Davis currently serves as an official team physician for the Sacramento Republic FC professional men's soccer team.

Research/Academic Interests

Dr. Davis' research interests include:

1. The Hormonal and Mechanical Factors of Knee Osteoarthritis Progression for Women.
2. Effect of Prolain on Exercise Performance, Metabolism and Post-Exercise Recovery in Healthy Subjects.
3. Effect of elevATP on Energy Levels, Metabolism and Exercise Performance in Healthy Athletes.
4. Effect of Sustained and Continuous Cooling on Physiology, Perceived Effort and Performance, While Riding in Hot Conditions.

Martin D. Hoffman, M.D.

Clinical Interests	Dr. Marty Hoffman has been fortunate to blend some of his professional activities with his personal pursuits involving endurance exercise and wilderness adventures. His research has focused on applied exercise physiology, human locomotion, pain perception and human performance, while his clinical work has involved cardiac rehabilitation, musculoskeletal medicine and sports medicine. He has been a competitive cross-country skier or distance runner for most of the last 40 years, with one of his recent accomplishments being the Grand Master (50-59 age group) National Champion of the 2008 USA Track and Field 100 Mile Trail Running Championship. He became a Fellow of the American College of Sports Medicine in 1989, has served as Director of Research for the Western States Endurance Run since 2006, and previously worked with the US Biathlon Team as a team physician and scientist. He serves on the editorial boards of the Archives of Physical Medicine and Rehabilitation, Science and Sport, and Research in Sports Medicine. He is also active in wilderness medicine as a certified Wilderness First Responder, works with his local Search and Rescue program, and has become a regular speaker at wilderness medical meetings.

Nanette C. Joyce, D.O., M.A.S.

Philosophy of Care Dr. Joyce believes in multidisciplinary patient centered care for treatment and education of rare neuromuscular disorders.

Clinical Interests Dr. Joyce specializes in Physical Medicine and Rehabilitation with a subspecialty in Neuromuscular Medicine. Her clinical interests focus on the diagnosis and treatment of motor neuron diseases, muscular dystrophies and myopathies. Dr. Joyce also specializes in electrodiagnostic medicine. Additionally, she is uniquely trained in the use of ultrasound to diagnose diaphragm dysfunction in patients with diaphragm paralysis due to motor neuron loss or phrenic nerve abnormalities.

Research/Academic Interests Dr. Joyce completed a clinical research fellowship sponsored by the California Institute of Regenerative Medicine working to develop a stem cell therapy for patients diagnosed with ALS. She continues to be part of a translational stem cell team, at the Institute for Regenerative Cures, that is dedicated to bringing stem cell therapies to clinic for patients with neuromuscular disorders. In addition, her clinical research interest focuses on developing better diagnostic strategies and treatments for patients with ALS and other neuromuscular diseases.

Craig M. McDonald, M.D.

Clinical Interests	Craig McDonald, M.D. is an internationally recognized expert in the clinical management and rehabilitation of neuromuscular diseases including muscular dystrophies and the development of novel outcome measures for clinical trials. He also is widely known for his expertise in the management of children and young adults with spinal cord injury and spina bifida.
Research/Academic Interests	<p>McDonald directs the NIDRR-funded Rehabilitation Research and Training Center in Neuromuscular Diseases and serves as principal investigator of the UC Davis NINDS-funded site in the NeuroNEXT Neurosciences Clinical Trials National Consortium. He is recipient of over \$16 million in federal grant support over the past 12 years.</p> <p>McDonald has been involved in a multitude of NIH, MDA, CDC and Shriners hospitals national committees and serves as a consultant to the pharmaceutical industry regarding clinical trials in Duchenne muscular dystrophy and other muscular dystrophies. He has served on many NIH study sections reviewing research proposals relating to neuromuscular diseases and rehabilitation sciences.</p> <p>His research has focused on novel clinical endpoint development in neuromuscular diseases, clinical trials and natural history studies in muscular dystrophies, metabolic syndrome, and energy expenditure in childhood disabilities.</p>

Chris S. Shin, M.D.

Clinical Interests My relationship with UC Davis stretches back to my undergraduate training. Throughout my stint here as a medical student and resident the institution has grown by leaps and bounds at a fairly dizzying pace. Being part of something so dynamic is one of the reasons I stayed on as faculty in this system once my training was over. In this system, I serve as a clinician, an educator, and an administrator. My clinical focus includes amputee prosthetic management, non-operative spine care, electro diagnostic testing, and general outpatient rehabilitation. As an educator, I am actively involved in the education of both medical students and residents in the classroom and clinical settings. My administrative duties come as the clinic medical director for the Physical Medicine Rehabilitation clinics at UC Davis. In addition to my work related responsibilities, I also enjoy giving back to the community by volunteering as the musculoskeletal coordinator at the Paul Hom student run free clinic on a monthly basis.

Carol Vandenakker-Albanese, M.D.

Clinical Interests Dr. Vandenakker Albanese has clinical interests in diagnosis and non-operative care of spine conditions and problems related to sequelae of polio. She speaks locally, nationally and internationally on topics related to spine care and the management of polio-related conditions. Dr. Vandenakker-Albanese is well-known for her expertise in post-polio syndrome and established the UC Davis Post-Polio Clinic in 2001. She serves on the medical advisory board for Post-Polio Health International as well as several local post-polio support groups. Dr. Vandenakker-Albanese reviews manuscripts for multiple medical journals and has authored several book chapters and peer-reviewed journal publications on topics relating to aging with disability, and rehabilitation of spine and post-polio conditions. As the department's Mentoring Director, Residency Program Director and as a Faculty Mentor for the medical school, she promotes quality medical education and fosters professional development.

Brandee Waite, M.D.

Clinical Interests

Dr. Waite's clinical focus is sports medicine and physical rehabilitation medicine, where she has served and treated wide range of elite athletes participating in professional leagues, national teams and extreme-endurance competitions. She also cares for "weekend warrior" level athletes and non-athletes with joint, muscle and nerve issues that prevent them from reaching daily activity goals.

Dr. Waite has served as a team physician for the U.S. national track and field program and for Sacramento's professional men's and women's basketball teams, and is currently a consulting physician for the Sacramento Ballet and a team doctor for UC Davis collegiate sports. She has directed multiple ultra-marathons and serves as a medical director and event physician for Racing The Planet, an organization that sponsors adventure races in Antarctica, the Sahara desert, the Himalayas and other extreme-weather locations worldwide.

Dr. Waite currently serves as an official team physician for the Sacramento Republic FC professional men's soccer team.

Research/Academic Interests

Dr. Waite's research focuses on musculoskeletal medicine and on physiologic changes, injuries and injury prevention in extreme-endurance athletes, especially ultramarathoners. Specific topic areas include knee osteoarthritis, anti-inflammatory treatments and prophylaxis, electrolyte levels and body composition changes. She has published book chapters and journal articles on a wide range of topics and presented for organizations such as the American College of Sports Medicine and the American Medical Society for Sports Medicine.

Dr. Waite co-directs the sports medicine fellowship program in UC Davis Health System's Department of Physical Medicine and Rehabilitation.

Barth L. Wilsey, M.D., M.M.S.

Clinical Interests	<p>Dr. Wilsey is heavily involved in clinical pain medicine research at UC Davis Medical Center and at the Sacramento VA Medical Center, where he also performs acupuncture services on a limited basis. One of his major research interests is the use of medical marijuana for neuropathic pain, and he is involved in a federally funded study of the analgesic and neuropsychological effects of cannabis when treating central pain from spinal cord injury. Dr. Wilsey also studies prescription opioid abuse, and collaborates on NIH and CDC grants involving computerization of historical pain-management information.</p> <p>Dr. Wilsey has a strong interest in research ethics and has chaired institutional review boards at UC Davis and the Northern California VA Health Care System. He believes translational research is particularly important for improving patient care.</p>
