

Ben Waldau, M.D.

Clinical Interests Dr. Waldau is a specialist in open cerebrovascular and endovascular treatment of cerebral aneurysms and arteriovenous malformations. His dual training in open surgery and endovascular embolization allows him to choose the best treatment modality for his patients, and sometimes he uses a combination of both approaches to achieve the best results. He also has an interest in stroke and extracranial carotid disease which he can treat with carotid endarterectomy or carotid angioplasty and stenting. With the establishment of the stroke unit at UC Davis, we are striving to provide highly specialized care to our vascular patients to achieve the best outcomes. Dr. Waldau's research focuses on transplantation of reprogrammed progenitor cells after stroke to enhance functional recovery. Human subventricular progenitor cells are harvested and reprogrammed to become motor neurons in collaboration with the UC Davis Stem Cell Program. The overall goal is to gather sufficient data to start clinical trials in stroke patients in the future.

Title Assistant Professor

Specialty Neurological Surgery, [Surgery - Vascular and Endovascular](#)

Department Neurological Surgery

Division Neurological Surgery

Center/Program Affiliation [Center for Neuroscience](#)
[Center for Skull Base Surgery](#)
[Spine Center](#)
[UC Davis Medical Group](#)

Address/Phone Lawrence J. Ellison Ambulatory Care Center, Neurosurgery Clinic, 4860 Y St. Suite 0100
Sacramento, CA 95817
Phone: 916-734-4300

Languages German

Education M.D., Ruprecht-Karls University, Heidelberg, 2002

Internships Duke University Medical Center , 2004-05

Residency Duke University Medical Center, 2005-10

Ben Waldau, M.D.

Fellowships University of Florida , 2010-11

William P. Van Wagenen Fellowship at Center for Regenerative Therapies Dresden, Dresden, 2011-12

Professional Memberships Society for Neuroscience

Honors and Awards CNS Basic Science/Translational Research Resident Fellowship Award, 2007
