

Omar Ahmed, M.D.

Philosophy of Care I chose pediatrics because I love the innocence and potential of children, and how parents often take better care of their children than they do of themselves. I strive to form a partnership with my families to reach our common goal of healthy, happy children. I particularly encourage those families who wish to raise their children in multi-lingual environments. I think the best care for children involves open and honest communication between all caregivers, including family, medical providers, and school/day-care.

Clinical Interests Omar Ahmed chose pediatrics because he loves the innocence and potential of children, and how parents often take better care of their children than they do of themselves. Ahmed strives to form a partnership with his families to reach a common goal of healthy, happy children. He particularly encourages those families who wish to raise their children in multi-lingual environments. Ahmed thinks the best care for children involves open and honest communication among all caregivers, including family, medical providers, and school/day-care.
