Provider referral and
transfer assistance:

800-4-UCDAVIS
(800-482-3284)

UCDAVIS
MEDICAL GROUP

medicalgroup.ucdavis.edu

UC Davis Medical Group offers nationally renowned primary care and specialty expertise based at UC Davis Medical Center and multiple medical offices across the greater Sacramento region. Medical group physicians, nurse practitioners and clinical nurse specialists emphasize wellness and prevention, apply the latest knowledge to solve health problems and offer access to promising clinical trials, newly proven therapies and advanced technologies when needed.

FOR PATIENTS

Find a UC Davis physician, nurse practitioner or clinical nurse specialist

Consumer Resource Center: **800-2-UCDAVIS (800-282-3284)**

- General information about available providers and services
- Assistance with appointments and referrals
- Information about accepted insurance plans

Established UC Davis patients can also use the MyChart web-based portal to communicate with their care teams, request certain appointments and refills, access medical records and more.

FOR HEALTH PROFESSIONALS

Outpatient referrals and provider phone consultations

UC Davis Physician Referral Center: **800-4-UCDAVIS (800-482-3284) Option #2** Monday | Friday, 8 a.m. to 5 p.m. Or online (non-urgent) requests via referrals.ucdavis.edu

- Information about availability of specialty services
- Coordination and status of referrals to specialty services
- Assistance for provider-to-provider phone consultations with specialists

Acute interfacility transfers and after-hours consultations

24/7 Transfer Center: **800-4-UCDAVIS (800-482-3284)**

- Round-the-clock, R.N.-led coordination of acute interfacility transfers
- After-hours coordination of emergent provider-to-provider telephone consultations for complex or unusual cases
- transfer requests evaluated based upon clinical urgency, availability of resources and other factors

Referring physicians can receive real-time access to test results and clinical information for their patients at UC Davis through the PhysicianConnect online electronic medical record.

Debra Ann Fishman, M.A., Psy.D.

Philosophy of Care	To assist individuals to identify and harness internal motivation to make positive health behavior changes that are consistent with their personal values and goals. Patients are viewed as collaborative partners in their care and services are delivered in a manner that respects personal interests, autonomy, and choice.
Clinical Interests	Clinical services are focused on assisting patients to engage in and maintain positive health behaviors, in order to prevent and/or manage single or multiple health issues.

J. Patrick Johnson, M.D., M.S.

Clinical Interests J. Patrick Johnson is an internationally renowned spinal expert who has directed spine centers at UCLA and Cedars-Sinai and is a leader in the rapidly emerging field of spinal technologies. He is an innovator in developing new minimally invasive surgical methodologies using computer-guided surgical procedures, endoscopic and minimally invasive surgical procedures and motion preservation procedures with artificial discs (including FDA/IDE clinical trials for two artificial disc devices). Dr. Johnson's other clinical research interests involve stem cell repair of the spinal column and the spinal cord, and he is one of a limited number of neurosurgeons who specialize in novel methods of treating scoliosis and complex spinal deformities.

Dr. Johnson draws from 20 years of clinical expertise in a wide variety of spine problems, including disc herniation, spinal stenosis, spondylolisthesis and related degenerative spine disorders. He also has experience with traumatic spine and spinal cord injuries, spinal cord tumors and spinal column tumors, spinal infections, congenital spinal anomalies, spinal vascular malformations and spinal deformity disorders.

Dr. Johnson has published more than 500 manuscripts, abstracts, books and book chapters in leading journals, and has lectured widely at national and international meetings on most aspects of spinal disorders and emerging technologies. He is actively involved in post-graduate fellowship training for surgeons in both orthopedics and neurosurgery and has trained more than 70 surgeons worldwide.

Kee D. Kim, M.D.

Clinical Interests

Dr. Kim is a neurosurgeon and the chief of spinal neurosurgery. He has a special interest and expertise in dealing with challenging spinal disorders requiring surgical treatment. He has vast experience in complex spine surgery, regardless of etiology, including tumor, infection, degenerative spine and trauma. He is at the forefront of computer-assisted spine surgery, minimally invasive surgery, and spinal instrumentation.

As a co-director of the UC Davis Spine Center, Dr. Kim is involved in multiple clinical trials as a primary investigator. He innovates and evaluates different cutting-edge technology to advance the field. Recent examples include the use of stem cells for disc regeneration and bony healing, the use of pharmaceutical agents for spinal cord injuries, and clinical evaluations of artificial disc and minimally invasive surgery. His research focuses on using the advances in different fields to bring about tangible improvement in patient care and surgical outcome.

He also devotes much of his time and resources to further the training of other surgeons both locally and abroad. As the UC Davis neurosurgery spine fellowship director, he has trained many residents and fellows who have gone on to become spine specialists in their respective groups. He has published numerous manuscripts and book chapters dealing with myriad of spinal disorders. As an expert recognized in his field, he has spoken at many national and international meetings. Dr. Kim's primary focus, however, remains providing the best possible care to his patients.

Ripul R. Panchal, D.O.

Clinical Interests

Dr. Panchal's clinical subspecialty is the management of spinal disorders including trauma, tumors (spinal and intradural), degenerative disease and osteoporotic fractures, adult deformity, infection, complex spinal revision and reconstructive surgeries. His surgical expertise includes minimal invasive spine surgery, computer-assisted surgery, and motion preservation surgery (disc replacement surgery).

Dr. Panchal's research focuses on biomechanics of the spine, spine and spinal cord injuries, and spinal instrumentation. He also is involved in national clinical trials involving cervical spondylolytic myelopathy, spinal cord injury, biologics to enhance spinal fusion, and stem cells for lumbar disc regeneration and cervical fusion. Dr. Panchal has been invited to present his research at the national level and serves as a peer reviewer for Global Spine Journal, The Journal of the American Osteopathic Association, and World Journal of Orthopedics.

Dr. Panchal integrates his growing interest in spine pathophysiology and biomechanics with his humanistic inclinations to provide the most comprehensive, compassionate neurosurgical care. He uses telemedicine to bring care to patients who otherwise would not be able to receive neurosurgical consultation.

Rolando F. Roberto, M.D.

Clinical Interests	Rolando F. Roberto specializes in adult and pediatric spine surgery. He treats diseases of the spine, including scoliosis, lumbar spinal stenosis, herniated discs of the cervical and lumbar spine, in patients from birth through advanced age. Roberto's research focuses on brace treatment of scoliosis, modern surgical methods of scoliosis treatment, and treatment of spinal trauma. He is fluent in Spanish.

Chris S. Shin, M.D.

Clinical Interests My relationship with UC Davis stretches back to my undergraduate training. Throughout my stint here as a medical student and resident the institution has grown by leaps and bounds at a fairly dizzying pace. Being part of something so dynamic is one of the reasons I stayed on as faculty in this system once my training was over. In this system, I serve as a clinician, an educator, and an administrator. My clinical focus includes amputee prosthetic management, non-operative spine care, electro diagnostic testing, and general outpatient rehabilitation. As an educator, I am actively involved in the education of both medical students and residents in the classroom and clinical settings. My administrative duties come as the clinic medical director for the Physical Medicine Rehabilitation clinics at UC Davis. In addition to my work related responsibilities, I also enjoy giving back to the community by volunteering as the musculoskeletal coordinator at the Paul Hom student run free clinic on a monthly basis.

Carol Vandenakker-Albanese, M.D.

Clinical Interests Dr. Vandenakker Albanese has clinical interests in diagnosis and non-operative care of spine conditions and problems related to sequelae of polio. She speaks locally, nationally and internationally on topics related to spine care and the management of polio-related conditions. Dr. Vandenakker-Albanese is well-known for her expertise in post-polio syndrome and established the UC Davis Post-Polio Clinic in 2001. She serves on the medical advisory board for Post-Polio Health International as well as several local post-polio support groups. Dr. Vandenakker-Albanese reviews manuscripts for multiple medical journals and has authored several book chapters and peer-reviewed journal publications on topics relating to aging with disability, and rehabilitation of spine and post-polio conditions. As the department's Mentoring Director, Residency Program Director and as a Faculty Mentor for the medical school, she promotes quality medical education and fosters professional development.

Ben Waldau, M.D.

Clinical Interests Dr. Waldau is a specialist in open cerebrovascular and endovascular treatment of cerebral aneurysms and arteriovenous malformations. His dual training in open surgery and endovascular embolization allows him to choose the best treatment modality for his patients, and sometimes he uses a combination of both approaches to achieve the best results. He also has an interest in stroke and extracranial carotid disease which he can treat with carotid endarterectomy or carotid angioplasty and stenting. With the establishment of the stroke unit at UC Davis, we are striving to provide highly specialized care to our vascular patients to achieve the best outcomes. Dr. Waldau's research focuses on transplantation of reprogrammed progenitor cells after stroke to enhance functional recovery. Human subventricular progenitor cells are harvested and reprogrammed to become motor neurons in collaboration with the UC Davis Stem Cell Program. The overall goal is to gather sufficient data to start clinical trials in stroke patients in the future.
