

## Tina L. Palmieri, M.D.

### Clinical Interests

**Clinical Program:** Dr. Palmieri treats patients with acute burn injury, inhalation injury and soft tissue disorders (toxic epidermal necrolysis, meningococemia, traumatic tissue loss) at both UC Davis Medical Center (adults) and Shriners Hospital for Children of Northern California (children). She also performs burn reconstruction for both adults and children after burn injury. UC Davis admits adult patients from Northern California, Nevada and adjacent western states. The burn center treatment philosophy is a team approach: professionals from multiple disciplines (nursing, respiratory therapy, nutrition, occupational therapy, physical therapy, child life, psychologists and pharmacists) working together to assure that each patient obtains the best outcome possible. Dr. Palmieri is President (2012-2013) of the American Burn Association.

**Research:** Dr. Palmieri is one of the leaders for Multicenter Trials Research in Burns. Dr. Palmieri's research focus is analysis of outcomes after burn injury, including both the immediate physical and long-term psychological effects of burn injury on patient quality of life. Dr. Palmieri is Director of the burns Data Coordination Center at UC Davis. She has received funding from the Department of Defense to study the impact of limiting blood transfusions on burn survival and infection rates. In addition, she studies how the body deals with acute burn stress (the hypothalamic-pituitary-adrenal response) after burn injury, and the long-term psychosocial impact of burn injury in both children and the elderly). Dr. Palmieri is one of the leaders of the Burn Multicenter Trials Group, which brings burn centers together to share information and to perform meaningful outcomes research.

Dr. Palmieri is the incoming Chief of Staff; currently Chair, Intensive Care Unit Committee and is a member of the Peer Review Committee, Quality of Care Steering Committee, Quality of Care and Patient Safety Committee, Self-Testing Accreditation Committee, as well as the Medical Executive Committee. In addition, Dr. Palmieri is nationally and internationally known by her participation on the American Burn Association (ABA) Board of Trustees and International Association of Fire Fighters Burn Foundation Board of Medical Advisors.

**Title** Assistant Chief of Burn Surgery, Shriners Hospital for Children of Northern California  
Director, UC Davis Regional Burn Center  
Professor

**Specialty** Surgery - Burn

**Department** [Surgery](#)
