UC Davis Medical Group offers nationally renowned primary care and specialty expertise based at UC Davis Medical Center and multiple medical offices across the greater Sacramento region. Medical group physicians, nurse practitioners and clinical nurse specialists emphasize wellness and prevention, apply the latest knowledge to solve health problems and offer access to promising clinical trials, newly proven therapies and advanced technologies when needed.

FOR PATIENTS

Find a UC Davis physician, nurse practitioner or clinical nurse specialist
Consumer Resource Center: 800-2-UCDAVIS (800-282-3284)

- General information about available providers and services
- Assistance with appointments and referrals
- Information about accepted insurance plans

Established UC Davis patients can also use the MyChart web-based portal to communicate with their care teams, request certain appointments and refills, access medical records and more.

FOR HEALTH PROFESSIONALS

Outpatient referrals and provider phone consultations
UC Davis Physician Referral Center: 800-4-UCDAVIS (800-482-3284) Option #2 Monday | Friday, 8 a.m. to 5 p.m. Or online (non-urgent) requests via referrals.ucdavis.edu

- Information about availability of specialty services
- Coordination and status of referrals to specialty services
- Assistance for provider-to-provider phone consultations with specialists

Acute interfacility transfers and after-hours consultations
24/7 Transfer Center: 800-4-UCDAVIS (800-482-3284)

- Round-the-clock, R.N.-led coordination of acute interfacility transfers
- After-hours coordination of emergent provider-to-provider telephone consultations for complex or unusual cases
- Transfer requests evaluated based upon clinical urgency, availability of resources and other factors

Referring physicians can receive real-time access to test results and clinical information for their patients at UC Davis through the PhysicianConnect online electronic medical record.
Paolo Andreassi, M.D.

Clinical Interests
Dr. Andreassi's interests focus on female urology, urinary incontinence, urodynamics, and neurourology. General urology continues to be an integral part of his practice with a special emphasis on bladder dysfunction and BPH. Dr. Andreassi brings significant experience to the department, having worked in a urology department in Italy for 11 years, before joining UC Davis.

Ralph W. deVere White, M.D.

Dr. deVere White is associate dean for cancer programs at UC Davis School of Medicine, director of the UC Davis Comprehensive Cancer Center and a professor of urology. He received his medical degree from Dublin University in Dublin, Ireland, and completed an internship and residencies in surgery and urology at St. Vincent's Hospital in Dublin and at Duke University Medical Center in Durham, NC.

The author of more than 300 peer-reviewed scientific articles and book chapters, Dr. deVere White serves on the editorial boards of six international scientific journals. His current research efforts focused on the molecular events that govern the response of prostate and bladder cancer to targeted therapies, the biomolecular mechanisms that make some prostate cancers more virulent than others, and new methods of diagnosing and treating prostate cancer.

He is the immediate past president-elect of the Society of Urologic Oncology, a member of the Clinical Society of Genitourinary Surgeons and an elected member of the prestigious American Association of Genitourinary Surgeons. He has been named multiple times as one of "The Best Doctors in America" and is one of four urologists serving as a volunteer consultant to the American Cancer Society's on-line "Experts Answers" bulletin board for questions about prostate cancer.

Christopher P. Evans, M.D.

**Philosophy of Care**

Dr. Evans' philosophy of care is to:

- fully assess the patient's medical condition, including how it relates to family and social circumstances;
- educate the patient fully about their disease process; and
- include the patient in the decision-making process that best suits the outcomes they seek.

In each case he looks for opportunity to enroll them in any new therapies or clinical trials that may be available and pertinent.

**Clinical Interests**

Dr. Evans' practice is dedicated to the management of patients with urologic malignancies. He works with medical oncologists and radiation oncologists to provide multimodal approaches to cancer therapy.

His surgical expertise includes robotic assisted laparoscopic radical prostatectomy with nerve sparing, complex renal surgery to include partial nephrectomy and vena cava thrombectomy, cystectomy with extended pelvic lymph node dissection and urinary diversion with orthotopic neobladders.

Dr. Evans also has expertise in treating patients with metastatic testicular cancer and performing retroperitoneal lymph node dissection in post chemotherapy patients.

**Research/Academic Interests**

Dr. Evans' research laboratory focuses on prostate cancer; specifically, mechanisms signaling the androgen receptor to activate prostate cancer growth and progression following castration. His laboratory has developed models to study this and has identified novel mechanisms that activate the androgen receptor.

His laboratory work has tested new agents and brought them from bench studies to animal models to clinical trials.

Clinical Interests

Dr. Gao’s research interests focus on understanding molecular mechanisms associated with progression of castration-resistant prostate cancer and metastasis to bone with the goal of identification of potential therapeutic targets for prostate cancer. Particular emphasis includes microRNAs, aberrant androgen receptor activation by cytokines and transcriptional factors such as Stat3 and NF-κB, selenium chemoprevention and therapy, and targeting cell signaling pathways (AR, IL-6 and Stat3) in prostate cancer. Dr. Gao’s lab was among the first to find that selenium regulates androgen signaling, find that IL-4 activates androgen receptor mediated by NF-κB and Stat6, made the discovery that IL-6 signaling in prostate cancer involves Stat3, and defined Stat3 and NF-κB interactions in prostate cancer. Dr. Gao has published over 60 peer-reviewed articles on the area of prostate cancers. Dr. Gao has served numerous NCI, DOD, and VA merits, and ACS review panels including SPORE and PPG study sections.

© 2016 UC Regents
My current research concentrates on the study of signal transduction pathways involved in prostate cancer development and progression. This includes studies on the EGFR family of receptor tyrosine kinases, leading to the PI3K/Akt pathway and finally to the mTOR signaling pathway. In particular, I investigate the interaction of these pathways with the androgen receptor. My research involves identification of significant therapeutic targets, as well as studying the effects of inhibitors of those targets both in vitro as well as in animal models. I am currently funded to study drug combinations that target parallel signaling pathways and in combination, appear to be highly effective in inhibiting the progression of prostate cancer.

John E. Gould welcomes LGBT patients.

**Philosophy of Care**
Wherever the art of medicine is loved, there is also love of humanity.

**Clinical/Research Interests**
John E. Gould specializes in male infertility including vasectomy reversal, microsurgical sperm extraction, electroejaculation, and vasopididymostomy.

Eric A. Kurzrock welcomes LGBT patients.

Clinical Interests

Eric A. Kurzrock's practice is dedicated to the urologic care of infants, children and adolescents. His areas of expertise include diagnosis and treatment of hypospadias, prenatal and congenital hydro nephrosis, hernias, hydroceles, neurogenic bladder, sexual ambiguity, undescended testicles, urinary infection, and vesico-ureteral reflux.

He has written extensively on pediatric urology and urogenital development. His research interests focus on reconstructive techniques, stem cell biology and tissue engineering.

Roger K. Low, M.D.

Philosophy of Care
Providing patients with comprehensive information to allow them to make personal treatment decisions. Partnering with patients during treatment and prevention of kidney stones.

Clinical/Research Interests
Roger K. Low specializes in the evaluation and treatment of patients with urinary stones. He is an expert in the latest endoscopic and minimally invasive procedures used to treat patients with stones. He provides comprehensive metabolic evaluation and consultation regarding prevention of stone recurrences.

His research interests include elucidating the pathogenesis of kidney stone formation and effects of bariatric surgery on kidney stone risk.

Jennifer G. Rothschild, MD, M.A., M.P.H.

Philosophy of Care
Dr. Rothschild’s philosophy of care is to educate her patients so they fully understand the breadth of their diagnosis and treatment plan. Dr. Rothschild believes in empowering the patient; they are included in the decision making process with detailed discussions about the expectations they seek. Dr. Rothschild emphasizes that with some diagnoses, a multistep approach is indicated; therefore, she maintains a continued relationship and aids in guidance of her patients to navigate the process and manage their urologic needs every step of the way.

Clinical Interests
Dr. Rothschild specializes in the diagnosis and treatment of male and female urinary incontinence. Her expertise includes lower urinary tract reconstruction, including artificial urinary sphincters and urethral strictures, as well as complex genitourinary reconstructions including urinary fistula repair and transvaginal mesh complications. Dr. Rothschild also is skilled in multichannel urodynamic evaluation.

Research/Academic Interests
Currently Dr. Rothschild is conducting research in outcomes in artificial urinary sphincters as well as sacral neuromodulation.
