Javier Lopez, M.D.

Clinical Interests Javier E. Lopez is interested in studying how soluble factors may regulate the transition of cardiac myocytes from regeneration during fetal growth to hypertrophic growth postnatally. It is postulated that the lack of cardiac regeneration in the postnatal heart confounds the myocyte dysfunction, cell death and tissue fibrosis that is associated with decompensated heart failure. Our global hypothesis is that by manipulating the cardiac gene program of the failing heart with soluble factors (drugs), we may augment endogenous and/or transplanted cardiac myocyte regeneration to ameliorate the progression of left and/or right ventricular failure. My laboratory focus is in studying the fundamental mechanisms of this growth transition to enhance the translational efficacy of soluble factors (drugs) and cell-based strategies (stem-cells) for cardiac regeneration in the failing heart.

Title Assistant Adjunct Professor

Specialty Cardiology, Cardiovascular Medicine, Internal Medicine

Department Internal Medicine

Division Cardiovascular Medicine

Center/Program Affiliation Cardiovascular Services

Address/Phone Lawrence J. Ellison Ambulatory Care Center, Cardiology Clinic, 4860 Y St. Suite 0200 Sacramento, CA 95817
Phone: 800-282-3284

Additional Phone Physician Referrals: 800-4-UCDAVIS (800-482-3284)

Education M.D., Temple University School of Medicine, Philadelphia, Pennsylvania, 1999

Internships University of Texas Southwestern, Parkland Hospital, Dallas, Texas, 2000

Residency University of Texas Southwestern, Parkland Hospital, Dallas, Texas, 2002

Fellowships UC Davis, Sacramento, California, 2009
UC San Francisco, San Francisco, California, 2006
UC San Francisco, San Francisco, California, 2007

Board Certifications American Board of Internal Medicine, 2002

UCDAVIS HEALTH

Javier Lopez, M.D.

American Board of Internal Medicine, Cardiovascular Medicine, 2010

Professional Memberships

Alpha Omega Alpha
Fellow and Scholar, Sarnoff Endowment for Cardiovascular Research
Member, American Heart Association, Basic Science Council
Member, International Society for Stem Cell Research
