End distributions 6/30/11 and begin new distributions 7/1/11. When a new appendix II is submitted for the fiscal year, it will affect the percentages of each component. For example, if last year’s salary was $300,000 and this year’s salary is $310,000, the percentages on each component will change. If the distribution does not end on 6/30/11 and new distributions begin on 7/1/11, it won’t interface into PPS. See examples below.
