Department of Pathology & Laboratory Medicine

Grand Rounds

June 6, 2016

Monday

12:00 – 1:00 PM

Path Building, Room 1002
4400 V Street
Sacramento, CA 95817

Walter E. Finkbeiner, MD, PhD
Professor of Pathology and Vice Chair
University of California, San Francisco
Chief, Department of Anatomic Pathology
Zuckerberg San Francisco General Hospital and Trauma Center

Presents,

“Diagnosis of Congenital Anomalies in Fragmented Fetal Specimens.”

Objectives:

1. Approach the examination of dilatation and evacuation (D&E) specimens with congenital anomalies in a systematic way.
2. Recognize common gross pathology findings of various congenital syndromes and associations.
3. Identify and interpret gross pathology findings associated with common chromosomal abnormalities.
4. Use a reporting template to efficiently report fetal pathology gross findings and final diagnoses.
