LABP000503

NEW TEST FOR HPV DNA TESTING  
NEW COLLECTION KIT FOR HPV and PAP TESTING

HPV DNA, High Risk testing is being replaced with the Roche Cobas HPV test: HPV - HIGH RISK,16,18. This FDA cleared test specifically identifies types HPV 16 and HPV 18 while concurrently detecting the rest of the high risk types (31,33,35,39,45,51,52,56,58,59,66 and 68). This test requires the use of Hologic PreservCyt (ThinPrep) collection vials.

Collection kits for Cytology PAP testing will also change to ThinPrep. Test name and ordering will not change for PAP.

COLLECTION AND TRANSPORT INSTRUCTIONS

- Instructions and specifications are on page two.
- Additional information on collection, including pictorial procedure and videos, can be seen at http://www.thinprep.com/hcp/specimen_collection.html
- A training specialist from the vendor will be on site at clinics January 15-22 to provide training, posters and training aids to the clinics, and to exchange vials. Site schedules will be coordinated and communicated with clinic management. Actual start date of the new vials at any given site will thus be dictated based on training schedule.
- Collection vials will be provided for startup, but additional supplies should be ordered by clinics:  
  ThinPrep PapTest™ PreservCyt Solution with Endocervical Brush/Spatula  
  Cal code # 40004409  
  Manufacturer # 70136-002, Hologic,Inc

HPV RESULTS

Positive or negative test results will be provided for the following three HPV categories:

- HPV HIGH RISK GROUP (31,33,35,39,45,51,52,56,58,59,66 and 68)
- HPV TYPE 16
- HPV TYPE 18
