Remote Access VPN- windows 7/vista/xp

This “How To” contains instructions for installing and using the AnyConnect VPN client. Once installed the Cisco AnyConnect Secure Mobility Client can be accessed from All Programs.

- Administrative rights are required to install applications/programs. If you do not have administrative rights, contact your system administrator. For UCDMC issued computers, submit a service request to request admin rights.
- You can download and install the client from inside or outside the UCDHS network, but to connect to VPN you have to be outside the UCDHS network or you can use Guest Wireless.
