2019 Evidence-Based Practice Fellowship

The EBP Fellowship is a 6-month mentorship program in which clinical nurses develop their leadership, problem-solving, and research utilization skills.

Applications for this competitive fellowship opportunity are reviewed and scored by peers on the Research Council. Clinical nurses identify a practice issue that may be addressed/improved by applying the latest evidence into practice. The program blends clinical nurses' knowledge and expertise with classes on research and other levels of evidence, the change process, and project evaluation. Fellows are mentored in the development, implementation and evaluation of EBP projects by a Clinical Nurse Scientist and a clinician (clinical nurse specialist, educator, or resource with expertise in the Fellow’s area of practice).

The first 4-hour seminar will be on February 4, 2019 and continue monthly on the first Monday for six sessions. Fellows are provided an additional four hours per month during the program to work on their project (8 hours/month total paid by the Fellow’s cost center).

Fellowship Eligibility

- Two or more years of nursing experience
- At least 1 year employment at UC Davis Health
- Employed >50% or .5 FTE as a clinical nurse

Details of the application process and content are available via the provided QR code and on the Center for Nursing Science website. Application includes a recommendation/endorsement from your manager/supervisor that is sent to them after you complete your online application. All items are due by November 12, 2018 at 5 pm.

Consider this fellowship program to help you answer your clinical questions and assure that your practice is evidence-based. This professional development opportunity is intended to advance your knowledge and benefits our patients and their families.
