**BMI Consultation - General**  
Conduct a preliminary discussion to determine the scope and needs of a specific project.

**Data Management Services**  
Provides assistance with  
- data specifications,  
- consistent terminology,  
- text for use in the informatics sections of grant applications,  
- cohorts of de-identified data to establish study feasibility,  
- assistance in preparation of a data set for statistical analysis.

**Build Electronic Data Capture Databases and Forms**  
REDCap is a tool, developed by Vanderbilt University, with self-service online web forms that are used to create databases and surveys for clinical research. REDCap is ideal for the management of all clinical and translational research data.

**Data Retrieval from EMR**  
Extraction of identified or de-identified, IRB-approved clinical data for retrospective analysis and prospective follow-up. Commonly used following a Cohort Discovery.

**Terminology Services (i.e., ICD-9, ICD-10, HL7)**  
Service to establish consistent terms used for research data sets.

**Training: Cohort Discovery, Data Explorer, REDCap, Research Volunteer Registry, SciVal, Velos and Data Management Systems**  
Both one-on-one as well as medium-size group training are available.
