Job Summary:

The UC Education Abroad Program (UCEAP) was established in 1961 and currently serves over 4,000 students from all UC campuses each year. There are UCEAP Study Centers in over 30 countries associated with over 100 host institutions. Over 1,000 foreign students attend UC campuses in reciprocal exchanges from international institutions.

Under general supervision and working closely in a team environment, this position supports the Senior Application Developer in all aspects of the development of mission-critical, enterprise-wide web applications. Provides second tier SharePoint development in support of EAP's internet portal and performs other duties as assigned.

Experience working with ASP.NET C# and SQL is required. Experience in SharePoint development is preferred. The position requires the ability to learn, to work independently or as part of a team, and to follow best standards practices as defined within the organization. Excellent communication and interpersonal skills and strong organizational abilities are required.

Job Requirements:

At least 3 years experience with C# and SQL developing web applications. Experience working with mission-critical, enterprise-wide applications. Excellent analytical, interpersonal, and communication skills with clear understanding of business process flow. Ability to create clear technical documentation using both written text and diagrams.

Preferred Skills:
Experience in the analysis of business requirements is strongly preferred. Experience in SharePoint development is desirable.
